

Reduce your phone bill to zero and create income for your charity

Support Telecom have created an innovative programme designed for charities. The **simple 3 step process** starts by giving your charity huge savings on your phone bills and, with your commitment continues to give you an ongoing monthly income. We offer your business community real savings on their phone bills and help them demonstrate corporate social responsibility.

Step 1 Phone bill reduced

We start by putting you on our **Charity Partner Tariff**, our lowest price band. Our charity partners have seen immediate savings of up to 50%. However, this is just the beginning.

Step 2 Phone bill eliminated

Together we can then offer your business community savings on their phone bills with our highly competitive **Business Partner Tariff**, with the added bonus for them of knowing that each time they pick up the phone they will also be helping to reduce your phone bill even further.

Step 3 Monthly donation

This is when it gets really interesting! We don't stop when your phone bill reaches zero. After that, you'll get a payment every month. The more business partners that get involved, the bigger the cheque you receive.

Everyone wins! Your charity can make phone bills and VAT a thing of the past and generate a new, regular source of income. Your business partners save on their phone bills, and it helps them demonstrate corporate social responsibility. It can also be the start of a much bigger, mutually beneficial relationship between local businesses and your charity.

To discover how much you will save on your phone costs from day one, visit our website and upload a recent phone bill. Alternatively to find out how you can take advantage of this programme, and how it's already helping other charities call Support Telecom today free on
